I'm a visual and experimental artist based in Bangkok. I work focuses on human experience, memory, and natural mediums such as graphite, clay, dust, handmade-paper, carbon powder and more. I begin with a quit exploration of the inner psyche before laying into abstract forms that reflect unsolved emotions, environmental wounds, and the fragile relationships between humans and other livings.

The artwork continues to evolve as clarity, authenticity, the raw reality of life's experiences. And truth of subconscious shapes artistic creation
